

## Sandon Capital Activist Fund

April 2012 Monthly Report

Entry/Exit Prices: \$1.2193/\$1.2096

### Fund Description

The objective of the Fund is to deliver returns to investors through a combination of capital growth and distributions. The Fund aims to achieve this objective by seeking to invest in opportunities that are considered by Sandon Capital to be trading below their intrinsic value and that offer the potential of being positively influenced by investors taking an active role in proposing changes in the areas of corporate governance, capital management, strategic and operational issues, management arrangements and other related activities. Neither returns nor capital are guaranteed.

### Fund Commentary

The Fund returned 2.1% in April in contrast to a decline of 0.9% in the Small Ordinaries Accumulation Index.

The strongest contributors this month were Calliden Group Ltd (CIX) (~1.9%) and Keybridge Capital Ltd (~0.5%). The weakest performer, Warrnambool Cheese & Butter Factory Ltd (WCB) (~-0.7%), gave away its gains of last months.

CIX's share price rose more than 30% during the month, closing almost 50% above its recent lows, reached in early March 2012. CIX provided an update on its first quarter operations, which appears to have been well received by investors, despite the fact it also announced the departure of its chief financial officer (not usually the greatest of signals). The Company advised that the two weather catastrophes so far this year appear, so far, to have lead to limited claims. The Company reiterated that it expects to achieve a modest profit for the full year. We note this guidance represents a significant turnaround from the 2011 loss of ~\$18.5 million (when we exclude the one-off \$8.3 million gain arising from the sale of the Company's 50% interest in Claims Services Australia).

We added several new positions to the portfolio during April, and disposed of two holdings where changed circumstances lead us to conclude there were little prospects for either active engagement or above cash returns.

We continue to remain cautious about the global macro outlook, though regulatory responses (that we do not consider solve root problems) can engender significant positive market responses. The consequences of the significant macro factors at play globally are difficult to predict or quantify.

We remain focused on opportunities that have high levels of tangible assets, marketable securities or cash and whose prospects are somewhat independent of market and economic conditions, as we believe these offer the best risk-adjusted returns in the current environment.
