Fund Commentary

The Fund delivered a return of 0.8% in August. Positive contributors included Emerging Leaders Investments Ltd (ELI) (partially hedged against the market by way of a short sale of an index exchange traded fund) and Coventry Group Ltd (CYG), each contributing approximately 0.5% to the month's result.

In the absence of evidence to the contrary, ELI appears on track to pursue its proposed restructure, whereby, if approved later this year, shareholders will have the opportunity to exit this investment very near the then prevailing net tangible asset backing.

The Fund's position in Trust Company Ltd (TRU) was slight negative contributor, as the long TRU position was only partially hedged by a short Perpetual Ltd (PPT) position (net contribution -0.3%).

We are patiently engaging with shareholders and Boards in a number of our positions, some of which we expect may come to fruition in coming months. Being patient allows us to build a greater weight of support for actions we and other shareholders espouse, thus increasing the chances of success. We look forward to reporting on these opportunities during later this year and early next year.

We remain cautious about the global macro outlook, as market conditions remain fertile for sentiment to overshoot value (both up and down). The consequences of the significant macro factors at play globally are difficult to predict or quantify.

We remain focused on opportunities that have high levels of tangible assets, marketable securities or cash and whose prospects are somewhat independent of market and economic conditions, as we believe these offer the best risk-adjusted returns in the current environment.
