### Fund Commentary

The Fund delivered a return of 0.8% in December, bringing total returns (net of all fees and expenses) since inception to the equivalent of 15.3% per annum. Positive contributions of between 0.4% and 0.6% were obtained from a number of holdings. The main detractor from performance was Antares Energy Limited (-0.7%) as falling oil price continues to wreak havoc across the energy sector. In December, two significant portfolio positions were realised – Calliden Group Limited (CIX) and Crowe Horwath Limited (CRH) had their respective schemes of arrangement approved by shareholders. In both instances, special dividends were also paid ahead of scheme implementations.

Sandon Capital (including SCAF) became substantial shareholders in a small resources company, Chesser Resources Ltd (CHZ) in late December. On 30 December, Sandon Capital Investments Limited submitted to CHZ a notice of a requisition of a general meeting to remove three of the existing directors and appoint a new director. Following a 15 cents per share return of capital in December 2014, CHZ's assets include approximately \$8.9 million in cash (~4 cents per share) and two Turkish gold prospects.

Cash holdings stand at 43%, a position that provides significant flexibility to take advantage of any opportunities.

We remain focused on opportunities that have high levels of tangible assets, marketable securities or cash and whose prospects are somewhat independent of market and economic conditions, as we believe these offer the best risk-adjusted returns in the current environment.
