Fund Commentary

The Fund delivered a return of 0.5% in June, bringing total returns (net of all fees and expenses) for the 2014 financial year to 28.9%.

During June, Sandon Capital announced a substantial shareholder in Coventry Group Limited (CYG), a company in which the Fund has had a shareholding since mid-2011. This announcement flagged an intention, along with another CYG shareholder, to seek to make changes to the Board of CYG. CYG's share price has persistently traded below the reported net assets per share for many years (both before and since we became shareholders). Since 2011, the company has held in excess of \$50 million in cash. Further the company has had substantial franking credits that would allow for the payment of a large special dividend. CYG's Chairman described in his address to the 2011 AGM, this cash as being held back for a strategy of "investment in new business areas...[that]...create long term shareholder value." Yet, there have been no meaningful achievements in that strategy. The businesses it retained have each faced significant challenges. When taking all of these factors into account, CYG appeared to be a highly prospective investment for the Fund.

We remain cautious about the global macro outlook, as market conditions remain fertile for sentiment to overshoot value (both up and down). The consequences of the significant macro factors at play globally are difficult to predict or quantify. We remain focused on opportunities that have high levels of tangible assets, marketable securities or cash and whose prospects are somewhat independent of market and economic conditions, as we believe these offer the best risk-adjusted returns in the current environment.
