

## Sandon Capital Activist Fund

May 2010 Monthly Report

Entry/Exit Prices: \$1.0384/\$1.0301

### Fund Description

The objective of the Fund is to deliver returns to investors through a combination of capital growth and distributions. The Fund aims to achieve this objective by seeking to invest in opportunities that are considered by Sandon Capital to be trading below their intrinsic value and that offer the potential of being positively influenced by investors taking an active role in proposing changes in the areas of corporate governance, capital management, strategic and operational issues, management arrangements and other related activities. Neither returns nor capital are guaranteed.

### Fund Commentary

The Fund reported a 4.2% decline this month in the context of a 7.4% decline in the S&P/ASX200 and an 8.2% decline in the Small Ords. In most positions that fell, prices fell along with the broader market.

A positive result came from Gunns Limited (~0.7% contribution), which rose strongly following the resignation of Chairman John Gay. His departure added more than \$185 million to Gunns' market capitalisation (from the day before he resigned to the end of the month) - never let it be said there is not significant value in board changes.

The significant detractors this month were Webster's Limited (~-1.6%) and Wallace Absolute Return Limited (WAB) (~0.8%). Webster's fell, on low volumes, for no company-specific reasons (aside from more sellers than buyers). Wallace fell on very low volumes too, though there were, in our view, reasons for this: Attempts to change the Board were unsuccessful and many shareholders were disappointed. Subsequent to month end, Wallace announced it had received a non-binding conditional takeover proposal.

We continue to maintain a partial hedge (~50% of equity exposure), now at 4200 on the S&P/ASX200 Index as we remain cautious about the potential impact of a wide range of macro factors beyond our control and which are, frankly, impossible to accurately forecast (both in terms of occurrence and impact). This position was a positive contributor to the performance this month (~1.2%). We increased cash levels to ~24%.

We remain focused on opportunities that have high levels of tangible assets, marketable securities or cash, as we believe these offer the best risk-adjusted returns in the current environment.
